Web www.pablorevuelta.com

I'm a Senior Software Developer specializing in React, TypeScript and Node.js, with experience delivering products across New Zealand, Australia and the USA. With a background spanning both software development and UX design, I have worked across startups, enterprise organisations and government agencies, leading projects independently and collaborating within cross-functional teams.

My primary focus is modern frontend development, design systems and full-stack web applications, with experience across a broad range of technologies and cloud platforms.

I enjoy solving complex problems, building intuitive user experiences and mentoring developers to deliver high-quality, practical solutions that create value for both users and stakeholders.

Technical skills

Core

React, TypeScript, JavaScript, Node.js, Playwright

Frontend

React Native, Svelte, Angular, Redux, Tailwind CSS, Emotion

Backend & Data

Node.js, Express, GraphQL, PostgreSQL, MySQL

Cloud & DevOps

Docker, AWS, OpenShift, Jenkins, Bitbucket Pipelines

Additional Experience

Scala, Java, Spring Boot, Three.js

UX & Design

Information architecture, user flow development, responsive interface design, wireframing and prototyping using Figma.

Work experience

Senior Full-Stack Developer (React & TypeScript)

NZ Police | Contract
Feb 2025 - Ongoing

- Refactoring a legacy desktop application into a modern web-based platform.
- Contributing to the development of a design system and reusable component library.
- Improving application architecture and promoting consistency across the user interface.

Technologies:

React, TypeScript, Jenkins, OpenShift, Spring Boot

Senior Full-Stack Developer (Svelte & TypeScript)

DotLovesData | Contract
Sept 2024 - Jan 2025

- Contributed to the development of a greenfield data visualisation application.
- Established development environments, deployment pipelines, and database integrations.
- Worked across frontend development, data sourcing and overall application delivery.

Technologies:

Svelte, SvelteKit, Node.js, Redis, Docker, AWS LightSail & S3, Bitbucket Pipelines, Snowflake, PostgreSQL

Senior Frontend Developer (React & Scala)

Goodcover (USA)

June 2022 - Aug 2024

Frontend Developer and UX Designer for a US insurance startup.

- Led a complete redesign of the marketing website, increasing marketing-to-quote conversions by almost 40%.
- Designed and implemented features for the member portal and quote system.
- Redesigned the quote flow to improve user experience and conversion.
- Collaborated closely with design, product and engineering teams.

Technologies:

Scala, React, Jenkins, Docker, GraphQL, MySQL, Figma

Senior Frontend Developer (React)

GS1 New Zealand | Contract

May 2021 - Feb 2022

- Contract frontend development role delivering new features and enhancements.
- Worked closely with stakeholders to support ongoing product development.

Technologies:

React, TypeScript

Senior Full-Stack Developer (React, Angular, Node.js)

Bank of New Zealand | Contract

Apr 2019 - May 2021

- Developed internal lending applications and component libraries.
- Contributed to Angular and React design systems used across BNZ digital products.
- Improved internal documentation, tooling and developer resources.
- Worked across frontend, backend and infrastructure concerns.

Technologies:

React, Angular, Node.js, Jenkins, OpenShift, AWS, Docker

Sole Full-Stack Developer

Locales

Aug 2016 - Apr 2019

- Sole developer responsible for architecture, infrastructure and delivery.
- Built websites, business applications, mobile apps and interactive kiosks.
- Managed deployments, cloud infrastructure and version control.
- Worked directly with clients to scope and deliver technical solutions.

Technologies:

React, React Native, Redux, Meteor, Node.js, SQLite, MongoDB, Bash.

Senior UX Designer → Frontend Developer (Angular)

Trade Me

Oct 2014 - Aug 2016

Initially joining Trade Me as a Senior UX Designer, I later moved into the new product team working on the next generation of the Trade Me website.

- Developed business features and contributed to the Angular component library using TypeScript.
- Worked closely with testers on unit and integrated testing to ensure high-quality releases.
- Collaborated with other developers on solution design, code reviews and pair programming.
- Worked within a cross-functional team delivering features for one of New Zealand's largest consumer websites.

Technologies:

Angular, TypeScript
